The training consists of 352 units of theory and supervised practices as well as the mandated individual sessions and case consultations.

Somatic Experiencing (SE)® is a basic concept for the understanding, prevention and resolution of trauma for professionals in the pedagogical, psychosocial and medical fields, and must only be used within the bounds of the therapeutic or professional authorisation. Certification as a Somatic Experiencing Practitioner (SEP) does not replace a therapeutic professional training. Through this certificate the SEP is committed to the EASE ethical code.
